-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 June 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7, 8 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by **Blackburn et al (5,092,313)**. **Blackburn et al** discloses a system (gas log fireplace) for exhausting smoke from a space which in this case would be the space of a home (SEE column 5, lines 4-30) wherein the exhaust created by the fireplace is directed out through opening (62) preventing the smoke from infiltrating the home (ie: building). The opening (62) is in the upper boundary and furthermore includes a make-up shaft (70) communicating through the upper boundary to below the smoke (SEE Figure 3). The make up shaft (70) (which is the space between elements (70) & (72)) extends into vent pipe (60) through which inner vent pipe (62) extends, while also extending to a position below where the smoke would accumulate. The upper boundary is taken to mean the area above the combustion chamber (12) which is not encased in firebox (10) and also includes openings (244) which also functions similiarly to vent pipe (62) except that it projects heated air into the space of the room (ie: building).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over **Blackburn et al (5,092,313)**. **Blackburn et al** discloses the applicants primary inventive concept as stated above but does not specifically recite the make-up air shaft (70) having a plurality of make-up air shafts. It would have been an obvious matter of design choice to modify the make-up air shaft by increasing the quantity for increasing the amount of air flow, since such a modification would have involved a mere variation of the component, a change of which is generally recognized as being within the level of ordinary skill in the art.

Allowable Subject Matter

Claims 1-6 and 14 are allowed.

Claims 10-13 and 16-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 6/23/06 have been fully considered but they are not persuasive. Examiner has addressed the applicants remarks in the enclosed rejection as they pertain to claims 7, 8, and 15 above which is maintained since the gas log fireplace of Blackburn et al operates in a home (anticipating the applicants added limitation of operating in a building space).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
